

Product Datasheet

Product Details

The INVI Hardware Touch Latch utilises a magnetic strike mechanism to hold the door in place, ready to be released with a simple touch along the door panel. Designed for easy opening and a secure close whilst the hardware fulfils a hidden door aesthetic where the installed door is completely flush with surrounding surfaces. The minimalist finish is completed by the mounting screws being hidden from view. Space efficiency comes from no protruding handles or parts to accidentally catch clothes on. The design allows for the body to be easily detached and replaced.

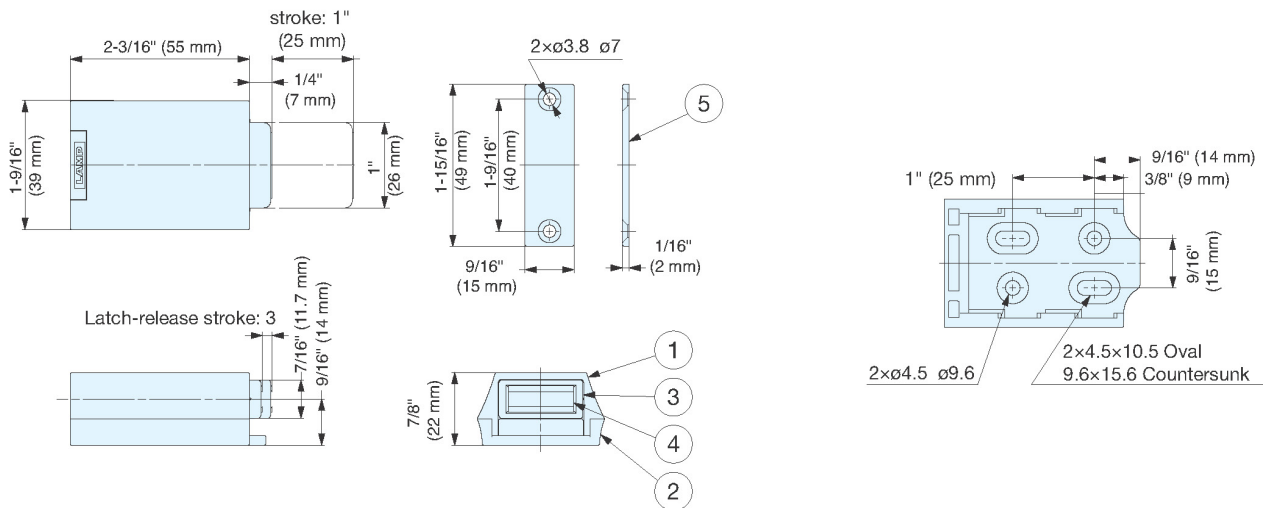

Profile

The INVI Hardware Touch Latch features two pieces: Zinc alloy Magnetic Lock Magnetic Latch

 To be fastened with flatheads screws.

Dimensions

Specification Details
